# COMPETITION

This is a 24-hour hackathon exclusively for our Freshers with an aim to encourage creative problem solving and recognize the essence of time management. Contrary to popular belief you don't need any skills to participate in a hackathon. One of the goals of a Hackathon is to teach you the required skills that you need to build a hack during the event itself. The participants can apply the techniques they learnt in workshop and use the same in presenting a solution to an already provided problem statement before the jury.

**WINNERS WILL GET EXCITING PRIZES!**

## GUIDELINES

- Competition will be held in teams. Each team may consist of 1-4 people. Presence of whole team during presentation is compulsory.
- Each team has to present their respective solutions before the jury within 10 mins. Presentation should be formal.
- Attire of the participants should be decent.
- Presentation should be submitted 1 hour prior to the competition.
- Everyone should reach venue on time with their team.
- Team registration will happen on the day of workshop by your team leader.
- Presentation submission link will be provided to the team leader.
